

Computer Programming II (CSE2035)

Week 2 Lab Session:

C Strings

A decorative graphic on the left side of the slide, consisting of a black crosshair intersecting a blue square, a red square, and a yellow square.

Dept. of Computer Science and Engineering
Sogang University

Exercise 0: Reversing a String

- **Skeleton code: w2_exercise_0.cpp**
- **Write a program to print characters of the string (given by the user) in reverse order**
 - Use the `gets()` function to take the original string from the user
 - You can use the `strlen()` function defined in `<string.h>` to compute the length of the given string

Expected output:

```
Enter the string: Sogang University  
Revered string: ytisrevinU gnagoS
```

Exercise 1: Copying Strings

- **Skeleton code: w2_exercise_1.cpp**
- **Write your own `my_strcpy` function to copy a string**
 - Your `my_strcpy()` function should take two strings as arguments (first argument: destination string, second argument: source string), copy the source string into the destination string, and return a pointer to the destination string
 - Use the `gets()` function to take two strings from the user
 - Don't use the `strcpy()` function defined in `<string.h>`
 - Don't even include `<string.h>` within your code

Expected output:

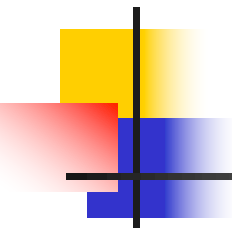

```
Enter the source string: Sogang
Enter the destination string: University
Copying source string into destination string...
Source string: Sogang
Destination string (copied from source string): Sogang
```

Exercise 2: Concatenating Strings

- **Skeleton code: w2_exercise_2.cpp**
- **Write your own `my_strcat` function to concatenate two strings**
 - Your `my_strcat()` function should take two strings as arguments, and return the concatenated string
 - Use the `gets()` function to take two strings from the user
 - Don't use the `strcat()` function defined in `<string.h>`
 - Don't even include `<string.h>` within your code

Expected output:

```
Enter the first string: Sogang
Enter the second string: University
Concatenating the first string and the second string...
Concatenated string: SogangUniversity
```

Lab Assignment Submission Instructions

- **Create “WeekX_Lab_yourID_name” folder**
 - E.g., Week2_Lab_20221234_문의현
- **Put your completed works (e.g., codes/files/programs) to the folder**
- **Compress (Zip) your folder**
 - E.g., Week2_Lab_20221234_문의현.zip
- **Submit/Upload your Zip file to the Cyber Campus in the “Assignments” section**
- **Due dates: All the lab assignments are due by Wednesday at 11:59pm, right after prior week’s lab session on Thursday**
 - Late submissions are not accepted
