

Computer Programming II (CSE2035)

Week 4 Lab Session:

ENUM, STRUCTURE, and UNION

Dept. of Computer Science and Engineering
Sogang University

Exercise 0: Understanding ENUM

- Skeleton code: `w4_exercise_0.cpp`
- The program displays the status of each student
- Struct “Student” contains two categories, one name and one attendance
- Your task is to complete enum type “Attendance” and function `printStudent()`

Expected output:

```
John is late.  
Caro is attended.  
Yiyi is absent.
```

Exercise 1: Sort Students

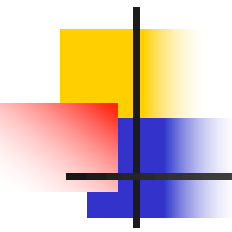

- Skeleton code: w4_exercise_1.cpp
- Complete blanks in the skeleton codes
- Your main task is to implement a comparison operator and functions of struct type “StudentProfile”
- We can use `std::sort` that is able to associate with comparison functions

Expected output:

```
The list of students.  
Gangso 203 1.500000  
Mapo 303 2.300000  
Sogang 101 3.000000
```

```
The list of students.  
Sogang 101 3.000000  
Gangso 203 1.500000  
Mapo 303 2.300000
```

```
The list of students.  
Mapo 303 2.300000  
Gangso 203 1.500000  
Sogang 101 3.000000
```

Lab Assignment Submission Instructions

- **Create “WeekX_Lab_yourID_name” folder**
 - E.g., Week4_Lab_20221234_문의현
- **Put your completed works (e.g., codes/files/programs) to the folder**
- **Compress (Zip) your folder**
 - E.g., Week4_Lab_20221234_문의현.zip
- **Submit/Upload your Zip file to the Cyber Campus in the “Assignments” section**
- **Due dates: All the lab assignments are due by Wednesday at 11:59pm, right after prior week’s lab session on Thursday**
 - Late submissions are not accepted
